Full Manuscript

Day Short Course Registration Fees

Early Bird (EB) spouse: 230 USD (About 250,000 KRW)
Early Bird (EB) full: 420 USD (About 450,000 KRW)
Full: 820 USD (About 900,000 KRW)

Due to the limited space for exhibition, early registration with the full payment is encouraged. The space will be reserved for you.

The exhibition registration includes one booth (3 m^2). Additional space can be arranged at a fee of 30 USD per m^2.

Important Dates

Submission due of abstracts: March 30, 2014
Full paper due: June 30, 2014

Scientific Committee Members

Prof. Jinsong LENG (Harbin Institute of Technology, China)
Prof. Ji-Won KIM (Seoul National University, South Korea)
Prof. Hyonny KIM (University of California, San Diego, USA)
Prof. Peter FOOTE (Cranfield University, UK)
Prof. Anthony CROXFORD (University of Bristol, UK)
Dr. Liming SALVINO (Office of Naval Research Global, USA)
Prof. Seunghee PARK (Sungkyunkwan University, South Korea)
Dr. Chan Yik PARK (Agency for Defense Development, South Korea)
Prof. Gyuhae PARK (Chonnam National University, South Korea)
Prof. Joong Hee LEE (Chonbuk National University, South Korea)
Dr. Yong Hak HUH (Korea Research Institute of Standards and Science, South Korea)
Mr. Jason HWANG (National Aerospace Laboratory NLR, Netherlands)
Prof. Jae-ichi TAKEDA (JAXA, Japan)
Prof. Heung Soap CHOI (Hongik University, South Korea)
Prof. Jung-Ik PARK (National Aerospace Laboratory NLR, Netherlands)
Dr. Charles FARRAR (Los Alamos National Laboratory, USA)
Dr. Geon Hwan KANG (Korea Research Institute of Science and Technology, South Korea)
Mr. Marinus BOS (National Aerospace Laboratory NLR, Netherlands)
Prof. Peter AVITABILE (University of Massachusetts Lowell, USA)
Prof. Keith WORDEN (The University of Sheffield, UK)
Dr. David CLARK (Los Alamos National Laboratory, USA)

Technical areas

- Health monitoring & diagnostic techniques: Structural, mechanical, optical techniques
- Vibration control: Active/passive, smart materials
- Health monitoring technologies for structural components: Applications in the fields of aerospace, automotive, marine
- SHM specific to advanced materials such as composites, ceramics, nanomaterials
- \textit{Optimization}
- \textit{Composites}
